## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 7 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurotaki.

There is disclosed in Kurotaki a cooking apparatus, comprising: a cabinet 2 having an opening in a top surface defining a heating space; a heating unit 12 installed in the opening; a grill unit 8 on the top surface of the cabinet; and a contamination preventing unit 7 included in the heating space, the unit including a cover part (sidewalls), a handle part 7b and a lower tray 7a.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Winstead.

There is disclosed in Winstead a cooking apparatus, comprising: a hollow cabinet 23 having a first opening in a top surface in which food is supported and a second opening 40 in side surface; a heating unit 34; and a contamination preventing unit 53 which collects material dropping from food.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1761

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurotaki in view of McLamb.

In regards to the use of an incline on the contamination preventing unit, McLamb discloses that such an incline is old and well known in the art. It would have been obvious to one skilled in the art to provide the unit of Kurotaki with an incline as taught by McLamb, in order to direct droppings from the food.

#### ***Allowable Subject Matter***

Claims 5, 9-14 and 21-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Rummel, Ashcom et al. and Cheng are cited for their disclosure of the state of the art.
